DEDICATION TO RALPH E. KLINGER	v
ABSTRACT	1
INTRODUCTION	2
Alluvial Fans and Their Deposits	4
Theoretical Basis	4
Significance of the Problem	5
Objectives	5
GEOLOGIC SETTING OF THE STUDY AREA	5
Proterozoic Basement Rocks	6
Ancestral Rocky Mountain Orogeny	6
Laramide Orogeny	6
Rio Grande Rifting	6
Neotectonic Sangre de Cristo Fault System	7
Pleistocene Climate	7
Range-Front Alluvial Fans	8
METHODS	8
Geologic Mapping and Morphometric Analysis	8
Facies Analysis and Associations	9
Soils as an Indicator of Surface Stability	9
Infrared Stimulated Luminescence Geochronology	9
GEOMORPHOLOGY OF ALLUVIAL FANS	10
Morphometry	10
Geomorphic Expression	15
SEDIMENTOLOGY OF ALLUVIAL-FAN DEPOSITS	16
Surficial Deposits	16
Sedimentary Facies	17
Major Sediment Transport Processes on Debris-Flow Alluvial Fans	29
Facies Assemblages and Subassemblages	29
SOIL DEVELOPMENT	34
CHRONOLOGY	36
SYNTHESIS AND DISCUSSION	37
Fan Processes Are Distinguishable in the Sedimentary Record	37
Primary and Secondary Processes Depend on Fan Formational Phase	37
Interpreting Debris-Flow Alluvial-Fan Dynamics from Process Time Scales	39
CONCLUSION	41
ACKNOWLEDGMENTS	43
REFERENCES CITED	43
